## Meet the Need in High-Traffic and Rural Areas

The demand for mobile connectivity continues to grow, and wireless network operators are scrambling to keep up with demand. New technologies like 5G and IoT are adding complexity. No worries. You're in the right place. Alpha Wireless makes a family of multiband, ultra-compact antennas that deliver powerful, affordable capacity wherever you need it.

Small Cell Tri-sector

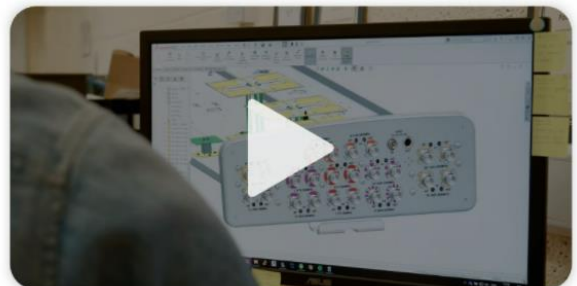

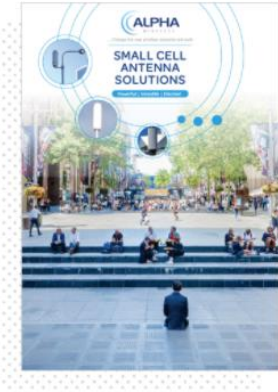

The CAN All-in-one Solution

## Easily Support Community Aesthetics with the CAN

Zoning and planning approval can be a huge stumbling block to expanding or building a network. The Alpha Wireless CAN passes easily because it's built to blend in with its surroundings.

## Hide Our Antennas in Plain Sight

We design our antennas with low visual impact. Their small size and unobtrusiveness can reduce rent, backhaul and potentially even power costs. Mount them virtually anywhere – on a wall, pole, roof or vertical structure. Because they blend in, planning and zoning approval is often quick, saving time and cost.
